EDUCATION

Iowa State University — Ames, IA

Graduated: May 2026

Bachelor of Science in Software Engineering, Minor in Cybersecurity

GPA: 3.53

- Honors & Awards: ECSEL Scholar, Roy J. Carver Scholar, Dean's List

PROFESSIONAL EXPERIENCE

Software Engineer Intern – Case Management Team

May 2025 – August 2025

Principal Financial Group — Des Moines, IA

- Built and deployed 3+ React/TypeScript features for the onboarding workflow
- Developed REST APIs to support frontend-backend integration
- Supported AWS deployment workflows for production applications

RELEVANT EXPERIENCE

Cell Phone Repair Technician / Sales Associate

August 2026 – Present

CPR Cell Phone Repair — Ames, IA

- Diagnose hardware and software issues across smartphones, tablets, computers, and other electronics
- Perform device repairs and component replacements following established procedures
- Assist customers with technical issues and recommend appropriate solutions

ISU Surplus Technician

December 2025 – May 2026

Iowa State University — Ames, IA

- Tested monitors, laptops, and desktop towers to verify functionality before resale
- Reset computers, installed and updated Ubuntu, and prepared systems for resale
- Diagnosed basic hardware and software issues during device preparation

STEM Scholars Tutor – COMS 227 (Java OOP)

March 2024 – Jan 2026

Iowa State University — Ames, IA

- Tutored students in Java, OOP, debugging, and data structures
- Led review sessions to reinforce programming concepts

Undergraduate Researcher – MATLAB-to-Python Conversion

August 2023 – December 2023

Iowa State University — Ames, IA

- Migrated MATLAB workflows to Python on AWS
- Developed scalable data processing pipelines for cloud execution

PROJECTS

CourseFlow | React Native, Spring Boot, PostgreSQL

August 2025 – May 2026

- Built a cross-platform degree planning application using React Native and Spring Boot
- Designed a PostgreSQL database and developed REST APIs for prerequisite visualization features

CyMarket | Java, Android Studio, REST APIs, WebSockets

January 2024 – May 2024

- Developed an Android marketplace app with real-time auctions and messaging
- Integrated REST APIs and WebSockets to enable real-time communication and auction updates

CyBot Autonomous Navigation Robot | C, ARM Cortex-M

August 2023 – December 2023

- Programmed an autonomous robot in C to detect and navigate around obstacles using PING SONAR and IR sensors, calibrating distance readings within 2 cm
- Implemented low-level embedded drivers (GPIO interrupts, ADC, Timer-based PWM, UART) directly against microcontroller datasheet registers
- Built an autonomous object-detection algorithm to identify and navigate to the narrowest object in a test field without collision

TECHNICAL SKILLS

Programming Languages: Java, Python, C, Assembly, JavaScript, TypeScript, HTML, CSS, SQL

Web & Backend: React, React Native, Spring Boot, Node.js, REST APIs, WebSockets

Data & Machine Learning: pandas, NumPy, Matplotlib, Logistic Regression, XGBoost

Systems & Testing: Linux, JUnit, TCP/IP, memory management, OS concepts, LEGv8 (ARM-based ISA)

Tools: AWS, Git, Android Studio
