EDUCATION

Iowa State University — Ames, IA

Graduated: May 2026

Bachelor of Science in Software Engineering, Minor in Cybersecurity

GPA: 3.53

- Honors & Awards: ECSEL Scholar, Roy J. Carver Scholar, Dean's List

PROFESSIONAL EXPERIENCE

Software Engineer Intern – Case Management Team

May 2025 – August 2025

Principal Financial Group — Des Moines, IA

- Built and deployed 3+ React/TypeScript features for a production onboarding workflow, including buttons, modals, and date-input functionality.
- Integrated frontend components with REST APIs to support onboarding workflows and backend data exchange.
- Collaborated with U.S. and India-based teams in Agile/Scrum development and supported AWS deployment workflows.

RELEVANT EXPERIENCE

Cell Phone Repair Technician / Sales Associate

August 2026 – Present

CPR Cell Phone Repair — Ames, IA

- Diagnose hardware and software issues across smartphones, tablets, and computers, performing repairs and component replacements.
- Assist customers with technical issues and recommend appropriate repair solutions.

ISU Surplus Technician

December 2025 – May 2026

Iowa State University — Ames, IA

- Tested laptops, desktop towers, and monitors; reset computers and installed or updated Ubuntu for resale.
- Diagnosed basic hardware and software issues during device preparation.

STEM Scholars Tutor – COMS 227 (Java OOP)

March 2024 – January 2026

Iowa State University — Ames, IA

- Tutored students in Java, OOP, debugging, and data structures.
- Led review sessions to reinforce programming concepts.

PROJECTS

CourseFlow | React Native, Spring Boot, PostgreSQL

August 2025 – May 2026

- Built a cross-platform degree planning application using React Native and TypeScript.
- Developed interfaces for student, advisor, and administrator workflows, including student RateMyProfessor features.
- Implemented full-stack advisor functionality using Spring Boot and PostgreSQL.
- Developed prerequisite visualization features backed by REST APIs and a PostgreSQL database.

CyMarket | Java, Android Studio, REST APIs, WebSockets

January 2024 – May 2024

- Developed an Android marketplace app with real-time auctions and messaging
- Integrated REST APIs and WebSockets to enable real-time communication and auction updates

CyBot Autonomous Navigation Robot | C, ARM Cortex-M

August 2023 – December 2023

- Programmed an autonomous robot in C to detect and navigate around obstacles using PING SONAR and IR sensors, calibrating distance readings within 2 cm.
- Implemented low-level embedded drivers using GPIO interrupts, ADC, timer-based PWM, and UART.
- Built an object-detection algorithm to identify and navigate to the narrowest object in a test field without collision.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, Assembly, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & APIs: React, React Native, Spring Boot, Node.js, REST APIs, WebSockets

Databases & Data Science: PostgreSQL, MySQL, pandas, NumPy, Matplotlib, Logistic Regression, XGBoost

Systems & Testing: Linux, JUnit, TCP/IP, memory management, operating systems, LEGv8 (ARM-based ISA)

Tools: Git, AWS, Android Studio
